

ABSTRACT OF THE DISCLOSURE

5 A telecommunication system incorporates individual station instruments simplified by
wireless operation, voice dialing, prepaid accounting and out-call operation, all enabled by
cooperative system operation including supporting central equipment. Wireless operation of the
central equipment involves a multiple port wireless platform along with other units for
interfacing a multitude of mobile station instruments simultaneously for interactive audio
communication to, regulate control, monitor and record operations of the instruments, and bridge
10 communication with selected remote terminals through the public switched telephone network.
Message capability, emergency abort to an operator station and security features supplement the
basic system.
